

Overview of ACAS® Product

The ACAS application includes the following functionality:

- **Aircraft Reports – Addresses, Fleet Reports (utilization by individual A/C & fleets), Summary Reports, A/C deliveries, New/Existing Orders, Airplane History.**
- **A/C Analytical Reports – Age/Hours/Landing analysis, Parked A/C analysis, Market/Mfg/Fleet performance, Engine/Airframe Orders analysis, Forecasts, and Trends analysis.**
- **A/C Maintenance Reports – Inspection Intervals, Shop Rates, Overhaul Capabilities, Removal Forecasts, Airframe Check Forecasts.**
- **Optional Modules**
 - **ACAS Product Tracker**
 - **ACAS Value Analysis (Avmark ®)**
 - **Aircraft Availability (Airfax ®)**
 - **A/C Time-Series (Monthly times from 1990 forward)**

Note: Additional Information on these modules is available from the [ACAS Electronic Brochure](#)

- **Update News – Full ACAS subscriber list, technical support, Application revision news.**
- **ACAS Contact Manager – Full feature customizable Addresses and Contacts.**
- **QDT (Query Design Tool). A SQL query generation tool for specialized queries using the .dbf tables. This tool is for advanced ACAS users but is very user friendly and extremely powerful and labor saving.**
